

# Thriving Workplace Culture Survey™

## Thriving Workplace Culture Survey™

The Thriving Workplace Culture Survey™ is a different type of survey in that it incorporates measures for both organizational and employee wellbeing as well as measuring the strength of current culture and disconnect with desired culture.

### The Survey measures Strength and Alignment of Culture in 6 key areas:

- Organizational Identity
- Leadership
- Growth & Development
- Workplace Climate
- Work-Life Integration
- Employee Wellbeing

It assesses organizations based on 14 key characteristics that make up a thriving workplace culture.

It includes a Cultural Fusion Score showing how balanced/imbalanced an organization is in tending to both organizational and employee wellbeing needs.

Separate analysis can be run specific to the unique needs of Millennials and the change they're bringing to the future nature of work.
